CLEANING

Big Wipes Goes 4x4

PRODUCT PROFILE

REQUEST MORE INFORMATION

Sycamore has launched its all new Big Wipes 4x4 range of industrial strength wipes. Containing four powerful cleaning agents and four dermatologically tested skin conditioners, Big Wipes 4X4 are formulated to remove all modern construction sealants, adhesives, paints, coatings and grime in an instant. The formula contains four of the world's greatest skin conditioners: Aloe Vera, Lanolin, Vitamin E and Glycerine, which help to nourish and protect the skin.

- Red Top: Heavy Duty — The blue scrub and clean fabric offers cleaning results that will be enhanced by the 4x4 formula. Textured and dual-sided, the scrub face of the wipe removes even the most stubborn grime, while the smooth face absorbs any excess.
- Black Top: Multi-Purpose — These wipes have been upgraded to a power fabric, which has been under development for two years. Multi-Purpose wipes combine toughness and absorbency using material exclusive to Big Wipes.
- Green Top: Multi-Surface — This super absorbent biodegradable wipe is ideally suited for applications involving the removal of non-hazardous substances where it can be disposed of in the normal waste or composted with biodegradable waste.
